

## Meritor Parts

The Meritor Business is a leading international dealer founded upon 100 years of tradition of quality and service. Meritor specializes in integrated systems together with different modules and parts to the original machine makers and aftermarket equipment within the transportation and industrial sectors.

Meritor prides itself in the company's unique energy and feels that this energy contributes to their competitive advantage within the worldwide operations. The business values all their clients and would like to guarantee their success while anticipating their diverse needs. Meritor starts with a tradition which values diversity of people and their broad thought processes. Operating in 19 nations and employing more than eleven thousand two hundred individuals, Meritor promotes innovation and collaboration amongst a team of experienced professionals.

By only employing future focused workers, Meritor strongly feels these top-caliber workers would be able to rapidly adapt to changing surroundings and exhibit the performance and commitment considered necessary to attain results in the competitive materials handling business. The company empowers their teams to make sound business decisions in order to improve the overall success of the company. In return, Meritor offers all their workers various opportunities for personal and professional development.

Their Advanced Engineering team is at the forefront of parts and system engineering that include drivelines, axles, braking and suspension systems for heavy duty and medium trucks, off-highway vehicles, buses, military vehicles and trailers. The Meritor Advanced Engineering team is developing. They started a new technical center in Bangalore, India in September 2009 in order to lead their advanced product development initiatives which represent the entire Asia Pacific region. This team is likewise responsible for supporting the requirements of all their international engineering workers.

The Quality team at Meritor is a customer-focused and dynamic group which is devoted to ensuring optimum progress at their production plants and aftermarket distribution facilities which are situated on 5 continents and in 19 nations.

The supplier development network is particularly located so as to support new business development. Regional teams are supported by worldwide initiatives, quality systems and centralized specialties in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program promotes a fact-based, data-driven method to decision making within every aspect of the company. The DFSS or also referred to as Design for Six Sigma ensures product reliability in each region. The team is also included transactional Green Belts who make use of Six Sigma tools to business techniques and implement lean methods.
